

# Adult Vaccinations

Following recommended guidelines for immunizations and health screenings is an important part of preventing disease and detecting health issues at an early stage. Recommended immunizations for adults may include vaccinations to protect against the flu, Hepatitis B and shingles.

## Recommendations for adult immunizations.

Preventing disease and detecting health issues at an early stage helps you live a healthy life. Visit [uhcpreventivecare.com](http://uhcpreventivecare.com) to find vaccination guidelines for all ages. Be sure to discuss specific health questions and concerns with your doctor and ask which vaccinations may be right for you.

## Easy access to vaccinations.

UnitedHealthcare contracts with a variety of providers, national pharmacy chains, and retail Convenience Care Clinics to provide members with easy access to vaccines. Plus, members get the highest level of benefit coverage (100% for most fully insured plans) for age-appropriate vaccines obtained from contracted network providers including:

- Network doctors or clinics
- Select retail pharmacies
- Network Convenience Care Clinics

Talk to your doctor about which vaccinations may be right for you.

Ask your employer or check your plan documents for your plan's specific coverage details.
